KLH Industries, Inc. expands CNC Turning capacity

Germantown, WI – February 23, 2010 - In order to satisfy a growing customer demand for CNC turning, KLH Industries, Inc. has invested in a Doosan Puma 480L turning center. This will now add to the current line-up of KLH's turning machines.

As KLH approaches AS9100 certification, current and prospective customers who require critical precision on heavy cutting will utilize the expanded turning capacity.

The Puma 480L was installed at KLH in mid February and is currently fully operational.

Max Turning Diameter	25.6 in
Max Turning Length	80.4 in
Max Spindle Speed	1500 rpm
Swing Over Bed	35.4 in

ABOUT KLH INDUSTRIES, INC.

KLH Industries, Inc. has been on the cutting edge of tool/part manufacturing for over 22 years and is ISO registered; AS9100 Certification scheduled for May 2010. They have applications ranging from aerospace, defense, medical, electronics and food processing along with machining capabilities including EDM (Wire & Sinker); Waterjet; Micro Hole EDM Drilling; and CNC Milling, Turning, and Grinding.
