**KLH INDUSTRIES, INC. ACQUIRES STATE OF THE ART  
VISION MEASURING SYSTEM**

Germantown, WI - October, 2008 - KLH Industries, Inc., a leader in the world of tool manufacturing and machining, has recently acquired Brown and Sharpe's new Tesa-Visio 300 CNC PCDMIS. The acquisition of this new vision measuring system ensures KLH Industries customers the most accurate system for measurement and quality assurance available.

The Tesa-Visio, a state-of-the-art vision measuring system, uses ultra-modern PC-DMIS Pro-Vision software that has a very unique, customizable graphics-based operator interface and can be designed to suit the most specific measurement tasks.

"Not many companies have the measuring system capabilities that we are able to offer our customers," says Steve Hendricks, KLH's Quality Engineer. "This technology is superior to other systems I have used and acquiring it keeps us in the industry leader position."

**ABOUT KLH**

KLH Industries has been on the cutting edge of tool/part manufacturing for over 21 years and are ISO 9001-2000 registered. They have applications ranging from aerospace, defense, medical, electronics and food processing along with machining capabilities including EDM (Wire & Sinker), Waterjet and CNC. With their dedicated staff of project managers, KLH Industries is sure to exceed expectations for any need along the manufacturing process.
